

# Redux Store

```
store.dispatch({  
  type: "action/type",  
  payload: "something"  
});
```

```
webWorker.postMessage({  
  type: "action/type",  
  payload: "something"  
});
```

```
store.subscribe(  
  () => { ... }  
);
```

```
webWorker.addEventListener(  
  "message",  
  () => { ... }  
);
```

```
store.getState()
```

# Nasza aplikacja

```
import {decrement, increment} from "../actions";  
import {handleActions} from "redux-actions";
```

```
export const defaultState = {  
  counter: 0,  
};
```

```
export const reducer = handleActions(  
  {  
    [increment]: (state, action) => { ... },  
    [decrement]: (state, action) => { ... },  
  },  
  defaultState  
);
```
